INDEX TO NOTES AND RECORDS, VOLS. 21 TO 30
(1966 TO 1975)

THIS is an index of authors and titles of articles and of substantial mentions in the articles of Fellows of the Society and others. The titles are entered under the first word, excluding the article and with the exception of forenames, and also under any other key-word appearing in the title. In title entries the author's name is given in round brackets after the title. Additionally, any substantial mention of a person in the text of an article is indexed under the name followed by the title in italic type. Proper names at the beginning of author or title entries are printed in bold type.

Illustrations and particularly portraits are noted. Where the subject of portraits included in an article are not named in the title, the names are given in square brackets after the reference to ports. There is no heading for the Royal Society, it being understood that this is the subject of the index as a whole. Appropriate headings will be found under the Society's activities and associations, e.g. Anniversary Dinner, Fellows, etc.
