

INDEX TO NOTES AND RECORDS, VOLUME 36, 1981-82

- Acoustics in the early Royal Society 1660-1680 (Penelope M. Gouk), 155
- Arnott, Neil, F.R.S., reformer, innovator and popularizer of science, 1788-1874 (R. A. Bayliss & C. W. Ellis), 103
- Bayliss, R. A. & Ellis, C. W. Neil Arnott, F.R.S., reformer, innovator and popularizer of science, 1788-1874, 103
- Bevis, John, M.D., F.R.S. (1695-1771), Astronomer Loyal (Ruth Wallis), 211
- Bishop, R. L. Rainbow over Woolsthorpe Manor, 3
- Chemical genetics, The classical period in Recollections of Muriel Wheldale Onslow, Robert and Gertrude Robinson and J. B. S. Haldane (Rose Scott-Moncrieff [Mrs O. M. Meares]), 125
- Classical period in chemical genetics. Recollections of Muriel Wheldale Onslow, Robert and Gertrude Robinson and J. B. S. Haldane (Rose Scott-Moncrieff [Mrs O. M. Meares]), 125
- Convergence of opinion on the divergence of lines: Faraday and Thomson's discussion of diamagnetism (D. Gooding), 243
- Cotter, C. H. Captain Edmond Halley, R.N., F.R.S., 61
- Darwin, C. R. Samuel Stutchbury and Darwin's cirripedes (L. Harrison Matthews), 261
- Diamagnetism. A convergence of opinion on the divergence of lines: Faraday and Thomson's discussion of diamagnetism (D. Gooding), 243
- Early problems in professionalizing scientific research: Nehemiah Grew (1641-1712) and the Royal Society, with an unpublished letter to Henry Oldenburg (M. Hunter), 189
- Ellis, C. W. & Bayliss, R. A. Neil Arnott, F.R.S., reformer, innovator and popularizer of science, 1788-1874, 103
- Faraday, M. A convergence of opinion on the divergence of lines: Faraday and Thomson's discussion of diamagnetism (D. Gooding), 243
- Flinn, D. John MacCulloch, M.D., F.R.S. and his geological map of Scotland: his years in the Ordnance, 1795-1826, 83
- Ford, B. J. The van Leeuwenhoek specimens, 37
- Fothergill, Dr John. A letter from Sydney Parkinson in Batavia to Dr John Fothergill (Averil Lysaght), 79
- Geological map of Scotland, John MacCulloch, M.D., F.R.S. and . . . : his years in the Ordnance, 1795-1826 (D. Flinn), 83
- Gooding, D. A convergence of opinion on the divergence of lines: Faraday and Thomson's discussion of diamagnetism, 243

- Gorham, E. Robert Angus Smith, F.R.S. and 'chemical climatology', 267
- Gouk, Penelope M. Acoustics in the early Royal Society 1660–1680, 155
- Grew, N. Early problems in professionalizing scientific research: Nehemiah Grew (1641–1712) and the Royal Society, with an unpublished letter to Henry Oldenburg (M. Hunter), 189
- Haldane, J. B. S. Onslow, Muriel Wheldale and Robinson, Robert and Gertrude. The classical period in chemical genetics (Rose Scott-Moncrieff [Mrs O. M. Meares]), 125
- Halley, Captain Edmond, R.N., F.R.S. (C. H. Cotter), 61
- Henshaw, Thomas, F.R.S. (1618–1700) (S. Pasmore), 177
- Hunter, J. 'The other' John Hunter, M.D., F.R.S. (1754–1809): his contributions to the medical literature, and to the introduction of animal experiments into infectious disease research (Lise Wilkinson), 227
- Hunter, M. Early problems in professionalizing scientific research: Nehemiah Grew (1641–1712) and the Royal Society, with an unpublished letter to Henry Oldenburg, 189
- Leeuwenhoek, A. van. The van Leeuwenhoek specimens (B. J. Ford), 37
- Letter from Sydney Parkinson in Batavia to Dr John Fothergill (Averil Lysaght), 79
- Lysaght, Averil. A letter from Sydney Parkinson in Batavia to Dr John Fothergill, 79
- MacCulloch, John, M.D., F.R.S. and his geological map of Scotland: his years in the Ordnance, 1795–1826 (D. Flinn), 83
- Matthews, L. Harrison. Samuel Stutchbury and Darwin's cirripedes, 261
- Meares, Mrs O. M. [Scott-Moncrieff, Rose]. The classical period in chemical genetics. Recollections of Muriel Wheldale Onslow, Robert and Gertrude Robinson and J. B. S. Haldane, 125
- Mills, A. A. Newton's prisms and his experiments on the spectrum, 13
- Newton, I. Newton's prisms and his experiments on the spectrum (A. A. Mills), 13
- Newton, I. Rainbow over Woolsthorpe Manor (R. L. Bishop), 3
- Oldenburg, H. Early problems in professionalizing scientific research: Nehemiah Grew (1641–1712) and the Royal Society, with an unpublished letter to Henry Oldenburg (M. Hunter), 189
- Onslow, Muriel Wheldale, Robinson, Robert and Gertrude and Haldane, J. B. S. The classical period in chemical genetics (Rose Scott-Moncrieff [Mrs O. M. Meares]), 125
- Parkinson, S. A letter from Sydney Parkinson in Batavia to Dr John Fothergill (Averil Lysaght). 79

- Pasmore, S. Thomas Henshaw, F.R.S. (1618–1700), 177
- Rainbow over Woolsthorpe Manor (R. L. Bishop), 3
- Robinson, Robert and Gertrude, Onslow, Muriel Wheldale and Haldane, J. B. S. The classical period in chemical genetics (Rose Scott-Moncrieff [Mrs O. M. Meares]), 125
- Scott-Moncrieff, Rose [Meares, Mrs O. M.]. The classical period in chemical genetics. Recollections of Muriel Wheldale Onslow, Robert and Gertrude Robinson and J. B. S. Haldane, 125
- Smith, Robert Angus, F.R.S., and 'chemical climatology' (E. Gorham), 267
- Stutchbury, Samuel, and Darwin's cirripedes (L. Harrison Matthews), 261
- Thomson, W. A convergence of opinion on the divergence of lines: Faraday and Thomson's discussion of diamagnetism (D. Gooding), 243
- Wallis, Ruth. John Bevis, M.D., F.R.S. (1695–1771), Astronomer Loyal, 211
- Wilkinson, Lise. 'The other' John Hunter, M.D., F.R.S. (1754–1809): his contributions to the medical literature, and to the introduction of animal experiments into infectious disease research, 227
- Woolsthorpe Manor, Rainbow over (R. L. Bishop), 3

NOTES AND RECORDS OF THE ROYAL SOCIETY OF LONDON

Volume 36, number 2 (1982)

CONTENTS

	PAGE
Acoustics in the early Royal Society 1660–1680 By PENELOPE M. GOUK	155
Thomas Henshaw, F.R.S. (1618–1700). By STEPHEN PASMORE	177
Early problems in professionalizing scientific research: Nehemiah Grew (1641–1712) and the Royal Society, with an unpublished letter to Henry Oldenburg By MICHAEL HUNTER	189
John Bevis, M.D., F.R.S. (1695–1771), Astronomer Loyal By RUTH WALLIS	211
‘The other’ John Hunter, M.D., F.R.S. (1754–1809): his contributions to the medical literature, and to the introduction of animal experiments into infectious disease research By LISE WILKINSON	227
A convergence of opinion on the divergence of lines: Faraday and Thomson’s discussion of diamagnetism By DAVID GOODING	243
Samuel Stutchbury and Darwin’s cirripedes By L. HARRISON MATTHEWS, F.R.S.	261
Robert Angus Smith, F.R.S., and ‘chemical climatology’ By EVILLE GORHAM	267
Index to Volume 36	273
