CONTENTS

Volume 68

Number 1 (2014)

Guest editorial

- The science of John Lubbock
by J. F. M. Clark 3

Research articles

- The teacher taught? What Charles Darwin owed to John Lubbock
by A. Pearn 7
- From Down House to Avebury: John Lubbock, prehistory and human evolution
through the eyes of his collection
by J. Owen 21
- John Lubbock, caves and the development of Middle and Upper Palaeolithic
archaeology
by P. Pettitt and M. White 35
- John Lubbock's early contribution to the understanding of river terraces and
their importance to geography, archaeology and earth science
by D. R. Bridgland 49
- John Lubbock, science and the liberal intellectual
by J. F. M. Clark 65

Volume 68

Number 2 (2014)

Editorial

- Historians and their sources
by R. Fox 91

Research articles

- John Ray in Italy: lost manuscripts rediscovered
by M. Hunter 93
- The scholar as craftsman: Derek de Solla Price and the reconstruction
of a medieval instrument
by S. Falk 111
- Observing the skies of Lisbon. Isaac de Sequeira Samuda, an *estrangeirado*
in the Royal Society
by C. C. Vieira 135
- John Tyndall and the Royal Medal that was never struck
by R. Jackson 151
- Wallace, Darwin and Ternate 1858
by C. H. Smith 165
- Lord Justice of Appeal John Fletcher Moulton and explosives production in
World War I: 'the mathematical mind triumphant'
by W. Van der Kloot 171

Lectures

- Address of the President, Sir Paul Nurse, given at the Anniversary meeting on 29 November 2013 187

Essay reviews

- An attenuated philosophical gentleman
by J. R. R. Christie 193

Corrections

- The teacher taught? what Charles Darwin owed to John Lubbock
by A. Pearn 199

Volume 68

Number 3 (2014)

Editorial

- Behind the appearances
by R. Fox 203

Research articles

- Philomaths, Herschel, and the myth of the self-taught man
by E. Winterburn 207
- Seventeenth-century ‘treasure’ found in Royal Society archives: the *Ludus helmontii* and the stone disease
by A. M. Alfonso-Goldfarb, M. H. M. Ferraz and P. M. Rattansi 227
- Margaret Cavendish and the Royal Society
by E. Wilkins 245
- Thomas Birch’s ‘weekly letter’ (1741–66): correspondence and history in the mid-eighteenth-century Royal Society
by M. Ellis 261
- A brief history of Lord Rutherford’s radium
by N. Todd 279

Recollections

- Margaret Thatcher’s influence on British science
by G. Guise 301

Reports

- Einstein in Britain: a portrait
by J. McManus 311

Volume 68

Number 4 (2014)

Editorial

- The nature of discovery
by R. Fox 319

Research articles

- How to manage a revolution: Isaac Newton in the early twentieth century
by I. Clarke 323
- John Dalton and the London atomists: William and Bryan Higgins,
William Austin, and new Daltonian doubts about the origin of the
atomic theory
by M. I. Grossman 339
- Defining a discovery: priority and methodological controversy in
early nineteenth-century anatomy
by C. Berkowitz 357
- A tale of oblivion: Ida Noddack and the ‘universal abundance’ of matter
by G. M. Santos 373
- Leonardo da Vinci and the origin of semen
by D. Noble, D. DiFrancesco & D. Zancani 391

Reports

- A rediscovery of Alfred Russel Wallace’s fern collection from
Borneo at the Cambridge University Herbarium
by D. Cicuzza 403

Guidance for Authors

Articles

Notes and Records: The Royal Society Journal of the History of Science is an international journal which publishes original research in the history of science, technology and medicine up to and including the 21st century.

In addition to publishing peer-reviewed research articles, *Notes and Records: The Royal Society Journal of the History of Science* welcomes recollections or autobiographical accounts written by Fellows and others recording important moments in science from the recent past. It also includes book reviews and news of research projects and online and other resources of interest to historians.

Submitted papers must be the author's own and original work, and must not have been published previously, nor be under consideration for publication elsewhere.

Contributions **should normally not exceed 8000 words**, excluding footnotes, and shorter contributions are always welcome. To ensure high-quality reproduction, and to prevent delays in publication, it is essential that figures be supplied in the correct format. Hand-drawn illustrations are not acceptable. **Authors are responsible for obtaining permission to reproduce artwork for which they do not hold copyright.**

Electronic submission details

Authors should prepare papers in accordance with our Instructions to Authors (see <http://rsnr.royalsocietypublishing.org>) and submit them electronically via the Internet. Visit our website for guidance on preparation.

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific progress. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Members.

Our mission: to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society's strategic priorities are to:

- invest in future scientific leaders and in innovation,
- influence policymaking with the best scientific advice,
- invigorate science and mathematics education,
- increase access to the best science internationally, and
- inspire an interest in the joy, wonder and excitement of scientific discovery.

Cover image: Underwater scene showing starfish, including the Goose foot starfish (*Anseropoda placenta*, described by the author as *Palmipes membranaceus*) on rocks.

The author collected these creatures at Whitenose near Weymouth, Dorset. The accompanying text reads: 'we obtained in the course of our day's work, several of that fine but common one, the Twelve-rayed Sun-star (*Solaster papposa*), a showy creature dressed in rich scarlet livery, some eight inches in diameter. Two or three of a species usually counted rare also occurred, the Bird's-foot (*Palmipes membranaceus*)...'

Plate 3 from the book *The aquarium: an unveiling of the wonders of the deep sea*, by Phillip Henry Gosse (Van Voorst, London, 1854). Inscribed: 'Pl.III. P.H.Gosse, delt. Hanhart, Chromo lith. STAR FISHES'.

Phillip Henry Gosse (1810-1888) was a populariser of marine biology and an aquarium inventor elected a Fellow of the Royal Society in 1856.
