NOTES AND RECORDS
THE ROYAL SOCIETY JOURNAL OF THE HISTORY OF SCIENCE

Notes Rec. is an international journal which publishes original research in the history of science, technology and medicine.

In addition to publishing peer-reviewed research articles in all areas of the history of science, technology and medicine, Notes Rec. welcomes other forms of contribution including: research notes elucidating recent archival discoveries (in the collections of the Royal Society and elsewhere); news of research projects and online and other resources of interest to historians; book reviews, including essay reviews, on material relating primarily to the history of the Royal Society; recollections or autobiographical accounts written by Fellows and others recording important moments in science from the recent past.

Notes Rec. is fully compliant with the open access requirements of a range of funders including the HEFCE (REF 2020), AHRC, Scottish Funding Council, Wellcome Trust and European Commission. It is designated as “green” on the SHERPA/ROMEO website. The Wellcome Library has made funds available to pay the open access publishing costs for publications that result from research based on the Library’s collections - more information can be found on its website.

The Royal Society is a self-governing Fellowship of many of the world’s most distinguished scientists drawn from all areas of science, engineering, and medicine. The Society’s fundamental purpose, as it has been since its foundation in 1660, is to recognise, promote, and support excellence in science and to encourage the development and use of science for the benefit of humanity.

The Society’s strategic priorities emphasise its commitment to the highest quality science, to curiosity-driven research, and to the development and use of science for the benefit of society. These priorities are:

- Promoting science and its benefits
- Recognising excellence in science
- Supporting outstanding science
- Providing scientific advice for policy
- Fostering international and global cooperation
- Education and public engagement
